

**WHITEWATER VALLEY
RURAL ELECTRIC MEMBERSHIP CORPORATION**

**SCHEDULE LP
LARGE POWER SERVICE EFFECTIVE APRIL 1, 2023**

AVAILABILITY

Available to members of the REMC whose maximum load requirements exceed 100 KVA transformer capacity for single-phase. Transformer capacity maximum is not applicable to three-phase; however, regardless of service provided, customers whose 12- month average demand exceeds 500 kW will automatically be transferred to the appropriate rate. The minimum monthly demand is 100kW.

TYPE OF SERVICE

Alternating current, 60-hertz, single-phase, 120/240 volts; or three-phase, 240 volts or other standard voltage values mutually agreeable to the member and the REMC. Standby or resale service is not permitted under this rate schedule.

MONTHLY RATE

| | | |
|---|----------------------|-------------------------------|
| Monthly Service Fee: | Single-Phase (LPSPH) | @\$118.00 per month |
| | Three-Phase (LP003) | @\$128.00 per month |
| Energy Charge: | | @0.03700 per kWh |
| Billing Demand Charge: | | |
| Distribution Delivery (all months) | | @\$10.78 per kW |
| Purchased Power Summer (June, July, August) | | @\$15.50 per kW |
| Purchased Power Winter (Dec, Jan, Feb) | | @\$14.23 per kW |
| Purchased Power Shoulder (Mar, Apr, May, Sep, Oct, Nov) | | @\$ 5.24 per kW |
| Excess Net kVARH Charge | | @\$.01009 per kVARh per month |
| Connect Charge: | | |
| First bill new/existing service (excluding seasonal service) | | @\$50.00 |

MONTHLY BILLING DEMAND MINIMUM

The minimum monthly billing demand charge under this schedule shall be 100kW

**SCHEDULE LP - LARGE POWER
EFFECTIVE APRIL 1, 2023
PAGE 2 OF 3**

WHOLESALE POWER ADJUSTMENT

The above rates are subject to a wholesale power adjustment clause as defined in Appendix "A".

DETERMINATION OF BILLING DEMAND

The Billing Demand shall be the Non-Coincident Demand adjusted for the power factor as determined below.

In any month the Non-Coincident Demand shall be the average number of kilowatts used by the member in the 15-min interval during which the energy metered is greater than in any other 15-minute interval in such month, as indicated or recorded by a demand meter and adjusted for power factor as provided below.

POWER FACTOR ADJUSTMENT

The member agrees to maintain loads, as close as possible, to unity power factor (100%). The REMC reserves the right to measure such power factor and to adjust the Non-Coincident Demand when the power factor at the time of the member's Non-Coincident demand is less than 97%. Power factor correction levels will be increased to 97% for, both leading and lagging. Such adjustment will be made by multiplying the Non-Coincident Demand by the ratio of the target power factor (97%) and the measured actual power factor percent at the time of the non-coincident demand.

The Average Monthly Power Factor (leading or lagging) is determined to be less than 95 percent, the "Excess Net kVARh" subject to the "Excess Net kVARh Charge" is the difference between the actual measured Net kVARh amount and a calculated Net kVARh based upon the recorded kWh for the month and the targeted average monthly power factor of 95 percent.

If the appropriate metering to measure peak power factor is not installed for this rate class, the REMC may measure the monthly average power factor. When the average power factor is determined to be less than 95%, the maximum load used for billing shall be determined by multiplying the metered maximum demand by 95% and dividing the product by the measured average power factor.

**SCHEDULE LP - LARGE POWER
EFFECTIVE APRIL 1, 2023
PAGE 3 OF 3**

PRIMARY METERING

Should the electrical energy used under this schedule be metered on the primary side of the service transformer, 1-1/2% of the kilowatt-hours so metered shall be deducted in computing the bill if equipment beyond primary metering is maintained by member.

TERMS AND CONDITIONS

1. The applicant will be required to give satisfactory assurance in writing as to the character, amount, and duration of the service required.
2. In general, motors having a rated capacity greater than ten (10) horsepower must be three-phase. All motors shall have manufacturer's nameplate specifying horsepower rating, voltage and other pertinent information.

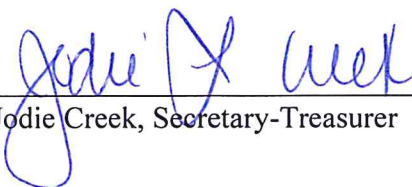

INTERRUPTION OF SERVICE

The REMC will make reasonable provisions to ensure satisfactory and continuous service, but does not guarantee a continuous supply of electrical energy and shall not be liable for damage occasioned by interruptions of service or failure to commence delivery caused by an act of God, or the public enemy, or for any cause reasonably beyond its control, including but not limited to the failure or breakdown of generating or transmitting facilities, floods, fire, strikes, or action or order of any agency having jurisdiction in the premises, or for interruptions which are necessary for inspection, repair, or changes in the generating equipment or transmission and distribution system of the REMC.

The member shall notify the REMC immediately of any defects, trouble or accident which may in any way affect the delivery of power by the REMC to the member.

Effective Date: April 1, 2023

Adopted by the Whitewater Valley REMC Board of Directors: October 25, 2022

Jodie Creek, Secretary-Treasurer
